BOOK SYNOPSIS

Grades 7-12 Finally, a book about content-area reading that's just as useful to math, science, and history teachers as it is to English teachers! Lively, practical, and irreverent, *Subjects Matter* points the way to activities and materials that energize content and engage students across all subject areas. This book features: 23 practical classroom activities that help students understand and remember what they read, in mathematics, science, social studies, English, and more; a tough analysis of today's textbooks, along with specific ways to use them more effectively; a new "balanced diet" of reading, including 150 books of interest to teenagers; instructions for growing a rich classroom library in your subject area; plans for setting up student book clubs and reading groups in any discipline; group-building techniques that create a productive community of readers; a do-it-yourself exploration of the ways smart readers think; models for developing ambitious thematic units within your classroom or with colleagues; special help and materials for students who struggle; scientific proof that the books recommended; activities that do improve reading and learning.

SUBJECTS MATTER EVERY TEACHERS GUIDE TO CONTENT - AREA
